PROFESSIONAL SUMMARY

Full-stack web developer and Information Systems graduate (GPA 3.93) with 1+ year of hands-on experience building and testing internal web applications. Specialized in Vue.js, React, and Python, with a track record of shipping a production dashboard that cut monthly reporting time by 40–50% for a national banking operations team. Comfortable across the stack — from responsive UI to backend APIs and data processing — and experienced collaborating with design, QA, and analyst teams. Seeking remote and junior web developer roles where I can deliver reliable, user-focused features.

TECHNICAL SKILLS

- **Frontend:** Vue.js, React.js, JavaScript, HTML, CSS, Tailwind CSS, Chart.js
- **Backend:** Python (FastAPI), PHP (Laravel), REST APIs
- **Databases:** PostgreSQL, MySQL, Oracle, SQL
- **Design & Tools:** Figma, Adobe XD, Git
- **Data & Analytics:** Excel / Google Sheets, SQL, Google Looker Studio
- **Languages:** Indonesian (native), English (professional working — TOEFL 557)

EXPERIENCE

Junior IT — PT. Bank Syariah Indonesia Tbk. (BSI)

Dec 2025 – Jun 2026

Alternative Channel & Government Project Group — Jakarta

- Designed and built a full-stack internal dashboard (Vue.js + Tailwind frontend; Python/FastAPI + PostgreSQL backend) to automate monthly reporting for the BSI Agen operations team, reducing reporting time by 40–50%.
- Delivered transaction analytics and regional data visualizations covering 128,000+ banking agents.
- Supported Core Banking Migration QA — system validation, issue identification, and reporting across migration phases.
- Conducted competitive benchmarking of BSI Agen against other banks and fintechs to identify feature gaps and improvement opportunities.
- Resolved agent complaints and operational issues while maintaining service-quality standards.

Programmer & Software Tester — PT. Lestari Jaya Raya

Oct 2025 – Nov 2025

IT Department

- Executed functional, UI/UX, and regression testing across internal applications to verify features met specifications and quality standards.
- Authored test cases, test scenarios, and QA checklists derived from system requirements.
- Collaborated with developer and analyst teams to identify, document, and report bugs and issues.
- Recommended improvements to application performance, usability, and consistency.

Front-End Web Developer — Chayon Online Course

Mar 2025 – Oct 2025

IT Division

- Built responsive, interactive web interfaces from UI/UX designs using a modern frontend framework.
- Ensured cross-device responsiveness and consistent behavior across browsers.
- Translated design-team mockups into production-ready, maintainable components.
- Performed ongoing maintenance and bug fixes to keep the live site reliable.

PROJECTS

BSI Agent Monitoring Dashboard

2026

- Full-stack dashboard monitoring 128,000+ agents, built with Vue.js and Python/FastAPI. Features transaction analytics and regional data visualization; reduced monthly reporting time by 40–50% for the operations team.

Telegram AI Food-Analysis Chatbot

2025

- Telegram bot that analyzes food images via the Google Gemini API, orchestrated with n8n (self-hosted on Docker). Implemented image encoding, webhook integration, and API rate-limit handling.

Apotek Huda Online Pharmacy — Undergraduate Thesis

2025

- Responsive online pharmacy built with Laravel as full-stack developer; 10+ product categories, intuitive navigation, and a streamlined checkout that improved the browsing experience.

Raakdatrri Online Clothing Store — College Project

2023

- Full-stack e-commerce site spanning UI/UX (Figma) and development, with a modern, responsive interface; contributed across product, design, and engineering.

EDUCATION

Bachelor of Information Systems — Gunadarma University

2021 – 2025

Depok, West Java • GPA 3.93 / 4.00

- Led a team developing a web application with the Laravel framework.
- Relevant coursework: object-oriented programming (Java), database design (MySQL, Oracle), Golang, C#, and JavaScript.

CERTIFICATIONS & TRAINING

- **BNSP Junior Web Programmer** — national competency certification in full-stack fundamentals (database implementation, responsive UI, web programming).
- **RevoU Tech Academy — Data Analytics & Software Development with AI** — SQL, data visualization, HTML/CSS, JavaScript, and end-to-end full-stack capstone projects.
- **TOEFL EPT (Daily Bahasa Inggris)** — Total score 557.
- **JavaScript Programming Fundamentals — LSP Universitas Gunadarma.**
- **Kampus Merdeka — MSIB Batch 6** (Certified Independent Study).
- **Additional:** Dicoding (programming, JS, SQL, project management); MySkill & Digital Skill Fair (UI/UX, Figma); CODEPOLITAN (HTML/CSS).
